Profile

Software Systems student with a strong engineering foundation in full-stack development and AI-powered application design. Experienced in building intelligent, end-to-end products - from adaptive assessment platforms to real-time civic-tech systems - demonstrated through hackathons, internships, and hands-on projects.

Education

M.Sc. Software Systems (5-Year Integrated),
Coimbatore Institute of Technology
2024 - 2029 | CGPA: 8.89/10

Internship Experience

Online Research Intern, *Funobotz Paper Robotics Pvt. Ltd.*
May 2026 - Jun 2026 | via Praya Labs | Remote | Cert. No: INPLNE026

- Contributed to the Funobotz AI Chatbot System, working on requirement analysis, conversational logic design, and implementation across the development lifecycle.
- Collaborated with the technical team on system testing and validation.

Technical Skills

Languages: C, C++, Python, Java, JavaScript, TypeScript

Frontend: React.js, Next.js 14, Tailwind CSS, Recharts, HTML5/CSS3

Backend: FastAPI, Node.js, REST APIs

Databases: PostgreSQL, Supabase, MySQL

Tools: Git, GitHub, Streamlit, VS Code

Certifications

- Career Essentials in Generative AI - Microsoft & LinkedIn Learning (2024)
- Data Analysis Job Simulation - Deloitte
- MVP to AI-Powered Apps: For Modern Web Developers - Internship Program
- UI/UX Design Workshop - NoviTech R&D
- Flask Workshop - FOSS Club, CIT
- Web3 Workshop - CIT

Achievements

- Best Theme - Special Mention, RAC-A-THON 2025 (national-level hackathon, Rotaract Club).
- Selected for Internship Opportunity, Codeathon 2.0 (national-level hackathon, Thiran 2026).
- Special Mention, Tech Sprint 2025.
- Participated in Melinia 2026 and Intellina 2026 technical competitions.

Projects

PulseBoard — Real-Time Social Trend & Brand Risk Analytics Platform github.com/niviii-08/PulseBoard

Tech Stack: React, TypeScript,TanStack Query, Zustand, Recharts, D3.js, Python, FastAPI, SQLAlchemy, Alembic, PostgreSQL, Redis, Celery, WebSockets, JWT, VADER NLP, Claude API (LLM), Feedparser, Docker, Nginx

Built a real-time social listening and brand monitoring platform to ingest multi-source web signals, track conversation momentum, and surface early crisis warnings through a full-stack architecture. Applied VADER sentiment analysis, Jaccard topic clustering, cross-platform propagation mapping, and LLM-grounded synthesis for automated trend detection and brand risk scoring.

SkillSync — AI-Powered Skill Assessment & Hackathon Platform github.com/niviii-08/SkillSync

Tech Stack: Next.js 14, TypeScript, Zustand, Supabase, GPT-4o

Built a skill-assessment platform with adaptive MCQs, webcam proctoring, live coding, and automated evaluation. Integrated GPT-4o, Supabase Auth, Piston code execution, and Zustand state management to support the workflow.

ContextIQ — Personal Behaviour Intelligence System github.com/niviii-08/ContextIQ

Tech Stack: Python, FastAPI, Next.js 14, PostgreSQL, SQLite, XGBoost, Scikit-Learn, Apriori / FP-Growth, TailwindCSS

Built a behavioral intelligence system to identify user activity patterns and model cognitive interruption-recovery costs through a leakage-safe ML pipeline. Applied Association Rule Mining for workflow pattern discovery and XGBoost for recovery-cost prediction, backed by temporal preprocessing and feature engineering.

LifeLink — Intelligent Blood & Emergency Response System github.com/niviii-08/Lifelink

Tech Stack: React, TypeScript, Python, FastAPI, Node.js, Express, SQLite, Firebase, PyTorch, Hugging Face (LoRA, RAG), FAISS, Leaflet

Built an emergency blood response and donor intelligence system to coordinate real-time donor-patient matching and track live regional inventory through a full-stack architecture. Applied LoRA-fine-tuned Transformers, NER, and a FAISS-backed RAG pipeline for automated emergency request parsing, urgency classification, and blood demand forecasting.

Roles

Video Editing Lead | 2025 - 2026, *GDG, CIT*
Event Chairperson | 2026, *Rotaract Club, CIT*
