PROFESSIONAL SUMMARY

Data & ML-focused Software Systems student experienced in building intelligent, end-to-end solutions for real-world problems. Strong in predictive modeling, data-driven problem solving, and deploying practical ML applications, with experience demonstrated through projects, hackathons, and industry certifications.

EDUCATION

M.Sc. Software Systems (5-Year Integrated) 2024 – 2029
Coimbatore Institute of Technology, Coimbatore CGPA: 8.88 / 10

TECHNICAL SKILLS

Languages: Python, SQL, C, C++, Java
Machine Learning & Data Science: Scikit-learn (Random Forest), XGBoost, Pandas, NumPy, TF-IDF & Cosine Similarity, Association Rule Mining, Feature Engineering
Data Engineering & Backend: FastAPI, SQLAlchemy, PostgreSQL, Alembic, MySQL, Supabase, REST APIs
Visualization & Frontend: Recharts, Interactive Dashboards, GIS Mapping, React.js, Next.js, TypeScript
Tools: Git, GitHub, Streamlit, VS Code

INTERNSHIP EXPERIENCE

Online Research Intern — Funobotz Paper Robotics Pvt. Ltd. *May 2026 – Jun 2026*

- Built and tested an AI-powered chatbot for the company (Funobotz Chatbot System), contributing to system design, development, and deployment as part of the project team.

DATA & ML PROJECTS

ContextIQ — Personal Behaviour Intelligence System | niviii-08/ContextIQ *2026*
Tech Stack: Python, FastAPI, SQLAlchemy, PostgreSQL (Supabase), Next.js 14, Association Rule Mining, XGBoost

- Built a privacy-conscious behavioral analytics platform with a dedicated ML pipeline for pattern discovery, association rule mining, and interruption-recovery-cost modeling over user context data.

MicroDelay — Personal Time Estimation Intelligence System | niviii-08/MicroDelay *2026*
Tech Stack: Python, FastAPI, Scikit-learn (Random Forest), SQLAlchemy, SQLite, React (TypeScript), Recharts, Web Speech APIs

- Trained isolated, user-specific Random Forest models to predict personal time-estimation bias, **reducing prediction error by ~10%** over baselines; built a voice data-capture pipeline (Web Speech APIs) feeding a Recharts analytics dashboard.

HeritageGuard — Predictive Analytics for Heritage Site Risk *2026*
Tech Stack: Python, Pandas, NumPy, Scikit-learn, OpenCV, GIS, FastAPI, React

- Proposed a multi-source predictive system combining environmental, structural, geographical, and visitor data to forecast heritage deterioration risk ahead of visible damage.

LifeLink — Blood Donation & Analytics Platform *2026*
Tech Stack: Python, SQL, Data Preprocessing, Data Visualization

- Built a data-driven blood donation platform (Python, SQL) to manage donor, recipient, and blood-request data, applying data analysis and visualization to surface blood-group demand patterns and support efficient donor–recipient matching.

LegalMind — NLP / Legal-Tech Contract Risk Auditor (RAG) *Ongoing*
Tech Stack: Python, FastAPI, Hugging Face Transformers, PyTorch, LoRA/PEFT, FAISS, RAG

- Building an NLP pipeline for layout-aware contract segmentation and transformer-based clause classification which implements semantic search and cross-encoder re-ranking against an approved clause library for risk scoring, with RAG-grounded redline generation to flag and rewrite risky contract clauses.

ACHIEVEMENTS & HACKATHONS

- Best Theme — Special Mention at RAC-A-THON 2025, a 24-hour national-level hackathon by Rotaract Club.
- Selected for Internship Opportunity at Codeathon 2.0, a national-level 24-hour hackathon under Thiran 2026.
- Special Mention at Tech Sprint 2025 for innovative solution design.
- Participated in Melinia 2026 and Intellina 2026 technical competitions.

CERTIFICATIONS & TRAINING

- Career Essentials in Generative AI — Microsoft & LinkedIn (2024) | Data Analysis Job Simulation — Deloitte | MVP to AI-Powered Apps — Internship
- UI/UX Design Workshop — NoviTech R&D | Flask Workshop — FOSS Club, CIT | Web3 Workshop — CIT | Code Buzz & Pitch Pit — Melinia 2026

LEADERSHIP ROLES

- **Video Editing Lead** — GDG (Google Developer Groups), CIT | 2025–2026 · **Event Chairperson** — Rotaract Club, CIT | 2026
