NEEVETHA N

neevetha2006@gmail.com | +91 9787209400 | Coimbatore, Tamil Nadu
linkedin.com/in/neevetha-n | github.com/niviii-08

PROFESSIONAL SUMMARY

Software Systems student focused on machine learning, multimodal AI, and intelligent systems, with hands-on experience developing and evaluating predictive and deep-learning models for real-world problems. Experienced in building end-to-end ML pipelines across computer vision, behavioral analytics, and NLP, with a strong interest in research-driven AI applications.

EDUCATION

M.Sc. Software Systems (5-Year Integrated) *2024 – 2029*
Coimbatore Institute of Technology, Coimbatore | CGPA: 8.89 / 10

INTERNSHIP EXPERIENCE

Online Research Intern — Funobotz Paper Robotics Pvt. Ltd. *May 2026 – Jun 2026*
via Praya Labs | Remote | Cert. No: INPLNE026

- Contributed to the design, development, and testing of the Funobotz AI Chatbot System, collaborating across the development lifecycle from requirement analysis and conversational logic implementation to system testing.

TECHNICAL SKILLS

Languages: Python, C++, C

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Excel, Power BI

Machine Learning: Scikit-learn, XGBoost, PyTorch, Feature Engineering, Statistical Analysis, Model Evaluation, Association Rule Mining

Deep Learning & NLP: CNNs, LSTMs, Transformers, TF-IDF, NER, Sentiment Analysis, RAG

Databases & Data Systems: PostgreSQL, MySQL, Supabase

ML Engineering & Tools: FastAPI, Git, GitHub, Streamlit

PROJECTS

ContextIQ — Personal Behaviour Intelligence System | niviii-08/ContextIQ
Python, FastAPI, SQLAlchemy, PostgreSQL (Supabase), Next.js 14, Association Rule Mining, XGBoost
Built a behavioral analytics system to identify user activity patterns and model interruption-recovery costs through a structured ML pipeline. Applied Association Rule Mining and XGBoost for pattern discovery and recovery-cost prediction, with data preprocessing and feature engineering.

CIVICLENS TN — Public Accountability & Civic Intelligence Platform | niviii-08/CIVICLENS
Next.js 14, React 18, TypeScript, Tailwind CSS, Python, Flask, SQLAlchemy, Alembic, SQLite/PostgreSQL (WAL Mode), PyTorch, Hugging Face (Sentence-Transformers), Scikit-Learn (DBSCAN, PCA), NetworkX, Docker
Built a full-stack civic intelligence platform for welfare tracking, public claim verification, and legislative analysis. Integrated bilingual Transformers, DBSCAN/PCA anomaly detection, and NetworkX provenance graphs for evidence-based accountability.

PulseBoard — Real-Time Social Trend & Brand Risk Analytics Platform | niviii-08/PulseBoard
React, TypeScript,TanStack Query, Zustand, Recharts, D3.js, Python, FastAPI, SQLAlchemy, Alembic, PostgreSQL, Redis, Celery, WebSockets, JWT, VADER NLP, Claude API (LLM), Feedparser, Docker, Nginx
Built a real-time social listening and brand monitoring platform to ingest multi-source web signals, track conversation momentum, and surface early crisis warnings through a full-stack architecture. Applied VADER sentiment analysis, Jaccard topic clustering, cross-platform propagation mapping, and LLM-grounded synthesis for automated trend detection and brand risk scoring.

LifeLink — Smart Blood Donation & Intelligent Matching Platform | niviii-08/Lifelink
React, TypeScript, Python, FastAPI, Node.js, Express, SQLite, Firebase, PyTorch, Hugging Face (LoRA, RAG), FAISS, Leaflet
Built an emergency blood response and donor intelligence system to coordinate real-time donor-patient matching and track live regional inventory through a full-stack architecture. Applied LoRA-fine-tuned Transformers, NER, and a FAISS backed RAG pipeline for automated emergency request parsing, urgency classification, and blood demand forecasting.

ACHIEVEMENTS & HACKATHONS

- Best Theme – Special Mention at RAC-A-THON 2025, a 24-hour national-level hackathon by Rotaract Club.
- Selected for Internship Opportunity at Codeathon 2.0, a national-level 24-hour hackathon under Thiran 2026.
- Special Mention at Tech Sprint 2025 for innovative solution design.
- Participated in Melinia 2026 and Intellina 2026 technical competitions.

CERTIFICATIONS

- Career Essentials in Generative AI – Microsoft & LinkedIn Learning (2024)
- Data Analysis Job Simulation – Deloitte | MVP to AI-Powered Apps: For Modern Web Developers – Internship Program
- UI/UX Design Workshop (NoviTech R&D), Flask Workshop (FOSS Club, CIT) & Web3 Workshop (CIT)

LEADERSHIP / ROLES

Video Editing Lead — GDG (Google Developer Groups), CIT *2025 – 2026* | **Event Chairperson** — Rotaract Club, CIT *2026*
